4th Newsletter

June 2023

We are excited to welcome you to our project's latest Newsletter! Thank you for being a part of our community!

We are thrilled to update you on the latest activities of JoinME, an Erasmus+ project related to AI and Industry 5.0 applications. Our aim is to develop a set of educational tools to assist higher education instructors in providing high-quality training, in compliance with the post-pandemic challenges. By strengthening the students' skills and enhancing their knowledge we hope to be able to create a diverse training program on entrepreneurship and encourage young individuals to establish their own companies, based on their innovative ideas.

The partners, in order to create a strong, sustainable connection with EU companies and business hubs, conducted preliminary field and desk research to identify unresolved challenges that could be faced with the use of Artificial Intelligence. Answering real and existing demands is expected to provide start-ups with a more resilient and promising future.

Preliminary research was a part of R1/A1 and R2/A2 and was completed successfully with the help of all the partners, and the work was summarized in compiled reports, in order to be used for the next steps. The creation of the case study notebook was another important step that the partners have completed so far.

In this edition, we will delve into the latest updates that our team has been working on, share valuable insights and provide some updates on our recent events.

Developing the Manual for organizing international seminars:

One of the project's valuable and expected results is the Manual on Organizing International seminars, which aims to support HEI teachers to adopt to the innovative multicultural program. During the latest period, the partners have been working on the content, brainstorming, and sharing ideas on the chapters of the Manual, possible challenges, and future obstacles. The partners have added their personal experience in an attempt to create a comprehensive and inclusive document, that will serve as an invaluable resource for teachers seeking to participate in the JoInME training program.

JoInME personal assistant and Skills Retention Service:

The framework and main functionalities of the JoInME personal assistant and Skills Retention Service that will host and support the project's intellectual results have been shared and discussed amongst the partners. Creative templates, including questions, registration options, learning actions, graphics have been suggested and agreed upon. The platform is expected to be filled with content originating from the core material real soon!

Stay tuned for sneak-picks into our project's results!

3rd TPM in Rotterdam:

ATERMON, a start-up focusing on intelligent uses of Game-Based Learning and Web 3.0 technologies, hosted the 3rd Transnational Project Meeting in Rotterdam on May 17, 2023. The meeting was successful, including discussions regarding the open issues, status of the current results, clarification of the next steps and updates on quality and dissemination activities.

Overall, the meeting was fruitful and crucial for the team building aspect of the project.
